Digital Accelerator Programme at PwC Switzerland

Introduction

Welcome to my internship project at PwC Switzerland, where I had the privilege to contribute to cutting-edge digital innovation. In an ever-evolving landscape, our commitment to staying ahead is paramount. Through this project, we harnessed the power of data visualization to reimagine our operations and enhance our competitive edge. Guided by seasoned experts, I led a transformative initiative that not only unlocked new opportunities but also shaped the trajectory of our digital journey. This experience underscores our dedication to pushing boundaries and embracing innovation. Welcome to the forefront of digital transformation, where every challenge presents an opportunity, and the possibilities are boundless.

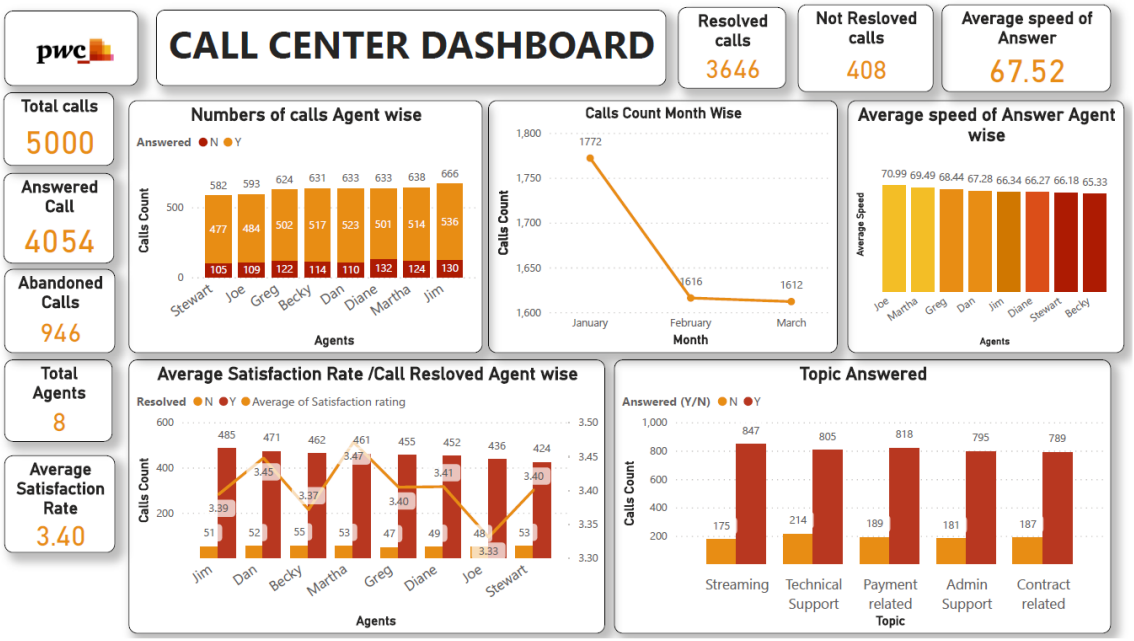
Task Overview

Task 1: Power BI Dashboard Creation for Call Centre Dataset (Telecom Company)

Welcome to the showcase of my recent project, where I demonstrate the power of upskilling in the digital age while delivering impactful insights through data visualization using Power BI. Throughout this project, I have delved into the significance of continuous learning and its pivotal role in adapting to the fast-paced digital landscape. Embracing the concept of becoming a "Digital Accelerator," I have explored and mastered essential skills required to navigate the digital future workplace effectively.

My primary task revolved around creating a dynamic Power BI dashboard tailored for a prominent telecom company, aimed at uncovering essential Key Performance Indicators (KPIs) and metrics crucial for their decision-making process. Leveraging the Call Centre Dataset, I meticulously analysed and visualized data points such as overall customer satisfaction, call centre performance metrics, and agent's performance quadrant. With guidance from my manager and access to curated resources, including podcasts and articles, I enhanced my understanding of data visualization techniques and upskilled myself in Power BI.

As I delved into the dataset provided, I unleashed my creativity to design a visually compelling dashboard that captured the essence of the client's requirements. Exploring various KPIs, including overall customer satisfaction, calls answered/abandoned, calls by time, average speed of answer, and agent's performance quadrant, I crafted insightful visualizations that provided actionable insights for our client.



Through this project showcase, I not only demonstrate my proficiency in Power BI and data visualization but also highlight my ability to contribute valuable insights that drive informed decision-making for our client. Join me on this journey of digital transformation as I showcase my work and make a tangible impact in the ever-evolving digital landscape.

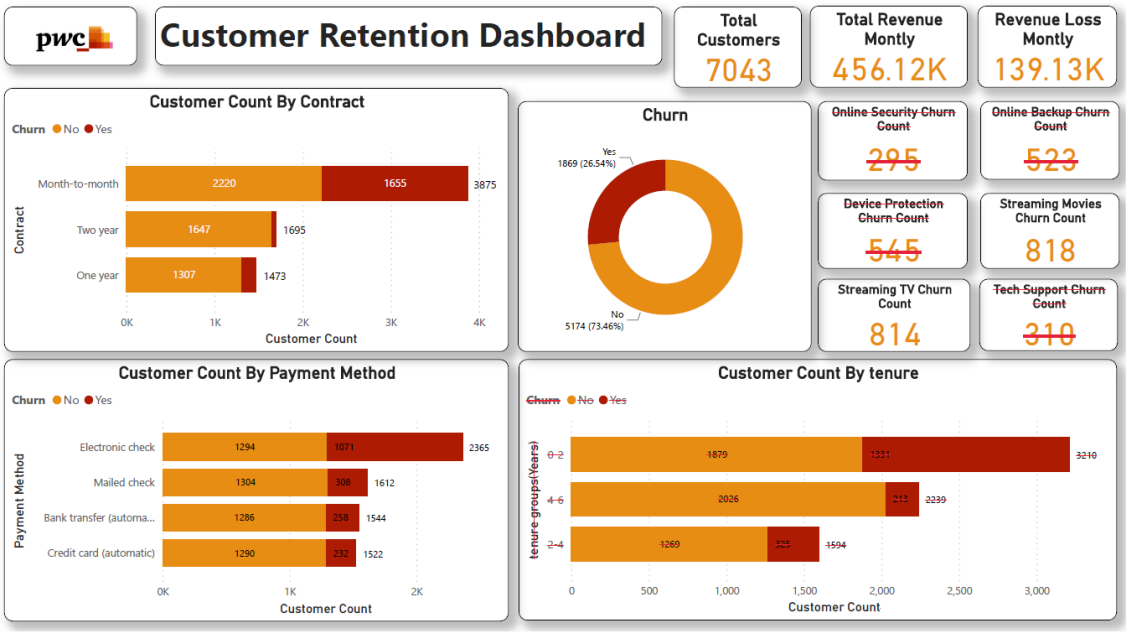
Task 2: Power BI Dashboard Creation for Customer Retention Dataset (Telecom Company)

I am excited to present my latest project, where I developed a dynamic Power BI dashboard for the Customer Retention Dataset, aligning strategic KPIs with organizational goals. This endeavour was a proactive response to the imperative need for insightful analytics in addressing significant churn and revenue loss within the organization.

Using Power BI, I meticulously analysed the Customer Retention Dataset to identify key metrics crucial for understanding customer behaviour and improving retention rates. By defining strategic KPIs such as Customer Count by Contract, Payment Method, and Tenure, I ensured alignment with organizational objectives while delving into the root causes of churn and revenue loss.

The highlight of my work was the creation of creative visualizations that brought the data to life, enabling stakeholders to grasp complex insights briefly. Through visually engaging charts and graphs, I conveyed the impact of churn and revenue loss, prompting stakeholders to take proactive measures.

To ensure effective communication of findings and propose actionable changes, I crafted a proactive email to the engagement partner. In this email, I succinctly outlined the key insights gleaned from the dashboard and proposed strategic actions to mitigate churn and revenue loss. By leveraging creative visualizations, I provided clear and compelling evidence to support my recommendations, empowering the engagement partner to make informed decisions.



Through this project showcase, I demonstrate my ability to leverage data-driven insights to address organizational challenges proactively. Join me as I present my work, showcasing how creative visualizations and proactive communication can drive meaningful change and improve customer retention outcomes.

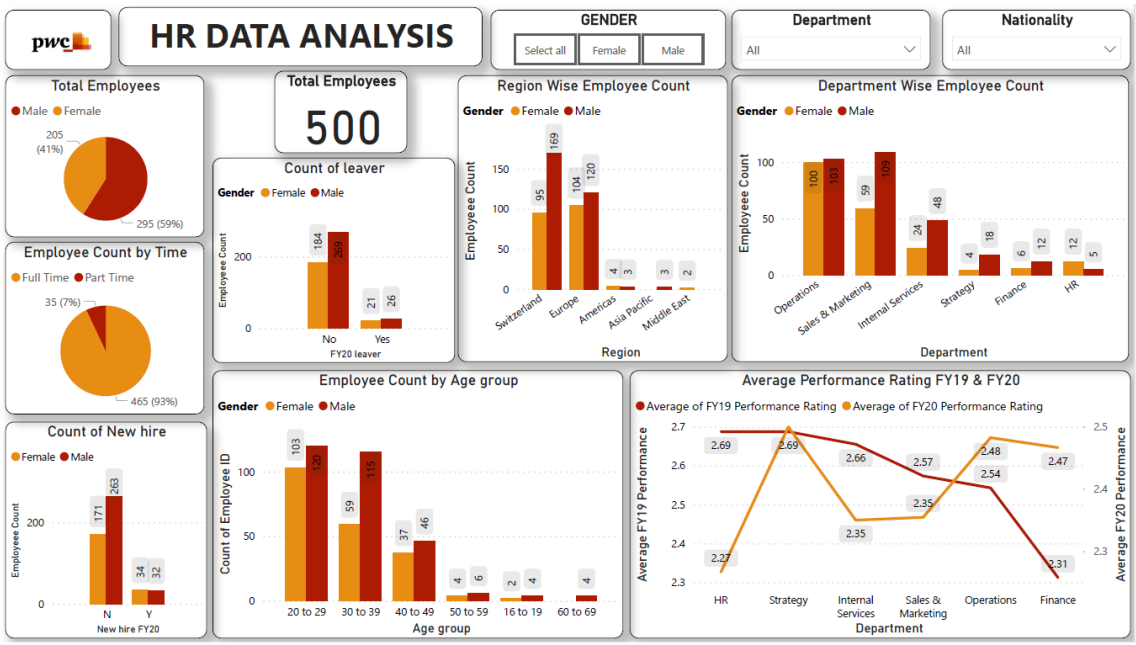
Task 3: Power BI Dashboard Creation for HR Dataset (Telecom Company)

Diversity & Inclusion, where I demonstrate my expertise in defining key performance indicators (KPIs) related to gender balance and diversity, and effectively visualizing HR data. In this project, I took on the challenge of addressing the slow progress in achieving gender balance at the executive management level for our telecom client.

My first task was to define relevant KPIs in hiring, promotion, performance, and turnover. Leveraging metrics such as the number of men and women in the workforce, turnover rates, percentages of promotions by gender, and average performance ratings, I gained deep insights into the organization's gender diversity landscape.

Next, I created powerful visualizations that effectively represented HR data, with a specific focus on gender-related KPIs. Through visually compelling charts and graphs, I illustrated the current state of gender diversity within the organization, shedding light on areas for improvement.

In addition to defining KPIs and creating visualizations, I conducted a thorough analysis to identify potential root causes for the slow progress in achieving gender balance at the executive management level. By examining factors such as recruitment practices, promotion criteria, workplace culture, and unconscious biases, I uncovered key issues contributing to the lack of gender diversity in leadership positions.



Through this project showcase, I not only highlight my proficiency in data analysis and visualization but also demonstrate my ability to drive meaningful change and progress towards gender equality and inclusion. Join me as I present my work, showcasing how strategic insights and visualizations can pave the way for a more inclusive and diverse workplace.

CONCLUSION

Through the Digital Accelerator Programme at PwC Switzerland, I've honed skills in data visualization, Power BI, and strategic analysis, tackling telecom industry challenges. From creating dynamic Power BI dashboards to addressing customer retention and promoting diversity, each project provided invaluable insights. Task 1, utilizing the Call Centre Dataset, showcased my proficiency in uncovering crucial KPIs. Task 2, with the Customer Retention Dataset, involved proactive customer retention strategies. Task 3, using the HR Dataset, delved into Diversity & Inclusion, identifying root causes for gender imbalance. These experiences emphasized agility, collaboration, and strategic thinking, reaffirming my dedication to driving meaningful change in the digital landscape.
